# **Mo-BUFF**

***Recoil Buffer for the Ruger 10/22 Rifle***

Mo-Rod.com is now offering the **Mo-Buff Recoil Buffer Pin for the Ruger 10/22 Rifle!**

Made of sturdy DuPont™ Delrin®, the **Mo-Buff** recoil buffer pin for the **Ruger 10/22 Rifle** replaces the factory steel bolt stop pin, eliminating the metal-to-metal “clank” when the action cycles. The cushioning effect of the **Mo-Buff** also minimizes recoil to practically nothing, thus providing the shooter with a near-immediate re-fire opportunity.

The **Mo-Buff** is simple and fast to install (instructions included), and is resistant to common gun cleaning and lubricating products. No permanent alteration to the rifle is required. The steel factory pin can always be re-inserted if desired. The **Mo-Buff** is sold singularly only, as no one has ever worn one out!

Accept no flimsy imitations (i.e. polyurethane) that wear out quickly. The **Mo-Buff** is constructed of genuine Delrin®, bridging the gap between metals and ordinary plastics, offering dimensional stability, fatigue resistance, and low friction, thereby helping to extend the life of integral 10/22 rifle components.

The best part...**just \$3.88!** (+ .75 shipping)
